

Motor Drives, Electric Motor Spindle Drives and Accessories

WE GET IDEAS MOVING

The spirit of innovation and a sense of ideas beyond the familiar has made us into a pioneering company over more than 185 years.

For a quarter of a century, we have been offering customized drive solutions for office and workplace workstations, as well as for shading systems and building technology.

Through our tradition of innovation, we have succeeded in establishing ourselves as a specialist and problem-solver in numerous areas.

Over 185 years' experience

More than 60 standard solutions for four different market segments

100%
Made in Black Forest

THE RIGHT PRODUCT FOR EACH APPLICATION

Motor drive 3112

Description

Compact 12 V DC motor with worm gear and through going hexagon socket. A cable with AMP plug and an integrated Hall sensor allows easy and secure control of the entire system. Easily adaptable via hexagon socket and anchor points.

Special features

- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Through going hexagon socket in wrench widths 6 mm and 9 mm
- Good self-locking properties
- 100 mm motor cable with connector included

Variant key

Variants are formed by different wrench widths.

Technical data

<i>Model</i>	<i>3112.00-1009</i>	<i>3112.00-1006</i>
<i>Motor</i>	DC motor 12 V	DC motor 12 V

Mounting example:

Screw M5x20
DIN 7380 (3x)

Technical notes

- The drive requires a suitable 12 V controller.
- The drive working range (nominal torque) is determined for a service life of 10,000 double strokes.
- By using a controller with a short-circuit brake the holding torque position of the drive can be increased.

Motor drive 3121

Description

Powerful 24 V DC motor with 2-stage worm gear with through going hexagon socket on the output.
The motor cable with AMP plug and the integrated Hall sensors allow secure connection and exact positioning of the entire system.

Special features

- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Through going hexagon socket in wrench widths 6 mm, 7 mm, 8 mm
- Good self-locking properties
- 220 mm motor cable with connector included
- Can be combined with most Ketterer spindle systems

Variant key

The variants are formed by the different wrench widths of the through going hexagon socket.
The design with fork head (see spindle drive 3120.00) is available upon request.

* Load determined for service life of 10,000 double strokes

Pin assignment

Installation position/mounting

Technical notes

- Please note the correct installation position of the drive! The drive is correctly mounted when it turns counterclockwise under load (see installation position/mounting).
- The drive working range (nominal torque) is determined for a service life of 10,000 double strokes.
- Through the controller* the system is regulated such that the speed in the entire drive working range is kept as constant as possible.
- By using a controller with a short-circuit brake the holding torque position of the drive can be increased.

* In combination with LogicData control box Compact-3

Motor drive 3130

Description

Compact 24 V DC motor with worm gear and continuous hexagon socket. Optimized sound characteristics due to elastic coupling and vibration damping fastening elements. Although the drive was developed for ergonomic table applications, it can be used in many other fields. The drive is designed and tested for axial pressure load. A cable with AMP plug and an integrated Hall sensor allows easy and secure control of the entire system.

Special features

- Vibration and sound-damped design through mechanical decoupling of the spindle system
- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Through going hexagon socket in wrench widths 6 mm and 7 mm
- Good self-locking properties
- 100 mm motor cable with connector included
- Can be combined with most Ketterer spindle systems

Variant key

The variants are formed by the different wrench widths and by fastening variants with and without fastening plate (Variant A or Variant B).

Technical data

Motor drive 3133.00

Description

Compact 24 V DC motor with worm gear and continuous hexagon socket. Although the drive was developed for ergonomic table applications, it can be used in many other fields. A cable with AMP plug and an integrated Hall sensor allows easy and secure control of the entire system.

Special features

- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Through going hexagon socket in wrench widths 6 mm, 7 mm, 9 mm
- Good self-locking properties
- Low noise
- 1000 mm motor cable with connector included
- Can be combined with all Ketterer spindle systems

Variant key

The variants are formed by the different wrench widths.

Technical data

<i>Model</i>	<i>3133.00-0016</i>	<i>3133.00-0017</i>	<i>3133.00-0011</i>
<i>Motor</i>	DC motor 24 V	DC motor 24 V	DC Motor 24 V
<i>Sensor/Power supply</i>	Hall/5 V DC/0.3 A	Hall/5 V DC/0.3 A	Hall/5 V DC/0.3 A

<i>Input</i>	hex 6 mm	hex 7 mm	hex 9 mm

* Determined at full load for service life of 10,000 double strokes

Pin assignment

Technical notes

- To ensure secure operation the motor must be operated in the predefined installation position (see installation position/mounting).
- The drive working range (nominal torque) is determined for a service life of 10,000 double strokes.
- The connection position of the drive in the entire system with vibration damping elements can be beneficial. However, the functional reliability position of the drive in the application should be tested.

* In combination with LogicData control box Compact-3

Installation position/Mounting

- Through the controller* the system is regulated such that the speed in the entire drive working range is kept as constant as possible.
- By using a controller with a short-circuit brake the holding torque position of the drive can be increased.

Motor drive 3133.48

Description

Compact 24 V DC motor with worm gear and through going hexagon socket. Although the drive was developed for ergonomic table applications, it can be used in many other fields. A cable with AMP plug and an integrated Hall sensor allows easy and secure control of the entire system.

Special features

- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Through going hexagon socket in wrench widths 6 mm and 9 mm
- High torque with minimum construction size
- Good self-locking properties
- Low noise
- 100 mm motor cable with connector included
- Can be combined with all Ketterer spindle systems

Variant key

The variants are formed by the different wrench widths.

Technical data

<i>Model</i>	<i>3133.48-0009</i>	<i>3133.48-0016</i>

Installation position/Mounting

Technical notes

- The drive working range (nominal torque) is determined for a service life of 10,000 double strokes.
- Through the controller* the system is regulated such that the speed in the entire work area position of the drive is kept as constant as possible.
- By using a controller with a short-circuit brake the holding torque position of the drive can be increased.

* In combination with LogicData control box Compact-3

DC-Motor drive 3143

Description

Powerful 24 V DC motor with worm gear and through going hexagon socket. Although the drive was developed for ergonomic table applications, it can be used in many other fields. A cable with connector and an integrated Hall sensor allows easy and secure control of the entire system.

Special features

- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Through going hexagon socket in wrench widths 6 mm, 7 mm, 9 mm
- Available as “power package” or as “high speed” variant
- Depending on variant: 1.2 m (variants: V01 / V02) or 0.1 m (variant V03) Motor cable with plug included
- Good self-locking properties
- Can be combined with all Ketterer spindle systems

Technical data

Motor drive 4773

Description

Powerful 24 V DC motor with two worm gears and a planetary gear.
High reduction ratio makes precise control and position setting possible.

Special features

- Compact, precise gears for sophisticated position adjustment
- High reduction ratio
- High drive torque
- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Low noise

Technical data

Model	4773.00-0002
Motor	DC motor 18 V
Sensor/Power supply	Hall/5 V DC/0.3 A
Protection class	IP30
Duty cycle idle speed	20% (at 5 min.)
Idle running speed	1 rpm (24 V) 1.5 rpm (32 V)
Max. drive torque*	40 Nm
Input	bore hole with keyway

* Load determined for service life of 10,000 double strokes

Motor drive for through going spindle 4778

Description

Powerful 24 V DC motor with worm gear, designed for non-rotating through going spindle for pushing and pulling movements. A cable with AMP plug and an integrated Hall sensor allows easy and secure control of the entire system.

Special features

- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Different type of internal thread for through going spindles
- Good self-locking properties
- Fast and powerful
- Order spindle separately

Variant key

The variants are formed by different internal thread types for connecting the spindles.

PIN type AMP170363

Installation position/Mounting

Technical notes

- Spindle is not included; must be ordered separately.
- Achtung: Note correct installation position (see installation example/position).
- The drive must be protected against lateral forces by a guide system.
- The drive working range (nominal torque) is determined for a service life of 10,000 double strokes
- By using a controller with a short-circuit brake the holding torque position of the drive can be increased.

Motor drive for through going spindle 4779

Description

Powerful 24 V DC motor with worm gear, designed for an axis parallel through going spindle. Ideal for integration in a lift column. The drive is only suitable for axial pressure load. A cable with standard connector and integrated Hall sensor technology permit simple and secure control of the entire system.

Special features

- Two integrated Hall sensors for measurement of the revolutions and direction of rotation
- Different type of internal thread for through going spindles
- Good self-locking properties
- Fast and powerful
- Order spindle separately

Variant key

The variants are formed by different internal thread types for connecting the spindles.

Electric motor drive system for large umbrellas 3062

Electric motor drive system for integration into the telescopic tubing system, consisting of motor, controller, gear and operating elements. The drivetrain is designed for high push and pull forces and opens/closes the large umbrella effortlessly at the push of a button. The set also includes a hand crank for emergency operation as well as a single-channel remote control. The system can be adapted to the pole tube inner diameter (DXX > 53mm), if required by the customer.

Special features

- Electric motor spindle drive, completely integrable in the pole tube
- Transmission ratio of drivetrain, electric drive – spindle $i = 1:1$
- Transmission ratio of drivetrain, crank – spindle $i = 1:4$
- Maintenance-free
- Flexibly adaptable to the customer needs:
Outer contour (min. 53 mm / max. 73 mm)

	3062.00-V01DXX
Voltage	230 V~/50 Hz
Electric current	1.0 A
Switch-on current (factor)	x 1.2
Motor power consumption	220 W
Drive output power	approx. 60 W
Rated torque / Nominal torque / peak torque	5 Nm / 7 Nm short time
Idle running speed	134 RPM
Rated speed	120 RPM @ 5 Nm
Mode of operation	2,5 min on, 45 min off
Ambient temperature / humidity	Operation: T = -10 °C to +60 °C / H max. 90% Storage: T = -15 °C to +70 °C / dry, non-condensing
Operating temperature, motor	Overheating protection with switch-off at approx. 110 °C
Protection class	IP 44
Transmission ratio <i>i</i> drivetrain electric drive - spindle	1:1
External diameter D	XX mm (Preferred variant 53 mm)
Speed of travel under nominal load	8 mm/s*
Max load peaks tensile-/compressive forces static	10,000 N

* in combination with spindle 25x4

Customized outer contour

View Y

Preferred variant of Ketterer
3062.00-V01D53

Outer contour of the drive can be realized customer-specific (DXX or QXX)
DXX max. round = Ø 73 mm
DXX min. round = Ø 53 mm
QXX max. square = □ 52 mm

Technical notes

- If installed vertically, it is essential to protect the drive against dripping water from above.
- The hand crank may only be used as an emergency hand crank; the drive must be disconnected from the power supply system. The planetary gear of the motor can be damaged if the hand crank is moved too quickly.
- Attention: Spindle systems with a spindle pitch of > 3 mm are no longer self-locking. Check the self-locking effect in the application!

Scope of delivery

- 1 x electric motor spindle drive, consisting of motor incl. controller and gear
- 1 x emergency hand crank with integrated ejection mechanism
- 1 x single-channel remote control

Attention: Spindle and spindle nut must be designed individually and ordered separately

Inline spindle drive 3120

Description

Motorized solution for the individual sit-stand workplace. Stepless height adjustment to customer specific stroke. A slender design allows to integrate the complete inline actuator into the tube of a table leg.

Special features

- Simple mounting
- Integrated position measuring system
- Single telescopic function
- Various spindle lengths and different spindle pitches are possible

Variant key

(rotation stop)

Technical notes

- Depending on the the spindle pitch, the system could back-drive.

Extension cable 3122.53-02

Inline spindle drive 3120 Heavy load

Description

Electric motorized spindle drive with matching spindle nut for stepless stroke adjustment with customized stroke height. Thanks to its slim design, it fits easily into narrow guideways and can move loads of up to 250 kg.

Special features

- Slim inline design
- Integrated position measuring system
- Spindle nut made of POM-C included
- Customized spindle length possible
- Spindle and spindle nut can be modified according to customer specifications (spindle type, material, geometry)

Technical data

Model	3120.00-1000
Motor	DC Motor 24 V
Sensor/Power supply	Hall/5 V DC/0.3 A
Protection class	IP30
Duty cycle	20% (at 5 min.)
Idle running speed	100 rpm (24 V) 150 rpm *
Stroke	430 mm
Type of spindle	Tr16x4RH
Max. lifting force	2500 N
Max. drive torque	5 Nm
Movement speed	10 mm/s
Cabel	0.2 m, connector AMP 6 Pin

* In combination with LogicData control box Compact-3

** Further types of spindles on request

Suitable motor cable: 3122.53-02

2x core drill hole
ø3.65/10 deep,
for self-tapping
screws for plastic

Spindle nut

Pin assignment

- | | |
|---------------------------------|--------------|
| 1. Motor black - | AMP 172168-1 |
| 2. Motor blue + | |
| | |
| 3. Hall sensor red +5V | AMP 172168-1 |
| 4. Hall sensor violet, output 2 | |
| 5. Hall sensor black - | |
| 6. Hall sensor green, output 1 | |

Technical notes

- Depending on the spindle pitch, the system could back-drive
- The spindle nut must be screwed directly to the wall of the frame/guide
- For a safe load support an axial thrust bearing is installed between drive and spindle
- Suitable motor cable: 3122.53-02

Inline spindle drive 3122

Description

Motorized solution for the individual sit-stand workplace. Stepless height adjustment to customer specific stroke.
A slender design allows to integrate the complete inline actuator into the tube of a table leg.

Special features

- Simple mounting
- Integrated position measuring system
- Single telescopic function
- Various spindle lengths and different spindle pitches are possible

Technical data

Model	3122.00-V01EXXXHXXX
Motor	DC Motor 24 V
Sensor/Power supply	Hall/5 V DC/0.3 A
Protection class	IP30
Duty cycle	20% (at 5 min.)
Idle running speed	180 rpm (24 V) 180 rpm *
Max. stroke	Retracted length -171 mm
Type of spindle	SG12x16P4 RH **
Max. lifting force	600 N
Max. drive torque	2.5 Nm
Movement speed	48 mm/s

* In combination with LogicData control box Compact-3

** Further types of spindles on request

Technical notes

- Depending on the the spindle pitch, the system could back-drive

Drive with throughgoing spindle 3146

Description

Direct current motor with worm gear and through-going not rotating spindle for push and pull movements.

Special features

- Two integrated Hall sensors for detecting the rotations and the direction of rotation
- With through-going spindle TR12x3 as standard
- Other spindle types available on request
- Spindle material, finishing and length of the spindle according to customer specifications

Technical data

Model	3146.00-0003
Drive motor	DC Motor 24 V
Sensor/Power supply	Hall/5 V DC/0.3 A
Protection class	IP30
Duty cycle	20% (at 5 min.)
Idle running speed	115 rpm (24 V) 120 rpm *
Type of spindle	Tr12x3 RH
Spindle length	in standard 400 mm Customized lengths possible
Max. drive torque	1200 N
Movement speed	6 mm/s

* in combination with LogicData Compact-3 control box

Pin assignment

|--|-------------|
| 4. Motor black -
8. Motor blue + | WST or ALEX |
| 2. Hall sensor red +5V
1. Hall sensor violet, output 1
3, 7. Hall sensor black -
5. Hall sensor green, output 2 | WST or ALEX |

Technical notes

- Depending on the the spindle pitch, the system could back-drive
- Attention: The mounting flange are only plugged together on the motor housing. When installing them in the system, the mounting holes on the side should be used and screwed on with the screws supplied loose. If side mounting is not required, the mounting flange can simply be omitted
- The drive can be installed both horizontally and vertically

Electric drive with synchronous telescopic spindle 4114

Description

Electric motor solution for the individual sit-stand workplace. Smooth running stepless height adjustment.

Special features

- Simple mounting
- Integrated position measuring system
- Twice telescopic
- Electronic synchronisation with up to 24 actuators
- Synchronous movement of the spindle units, double stroke speed

Technical data

Model	4114
Motor	DC Motor 24 V
Sensor/Power supply	Hall/5 V DC/0.3 A
Protection class	IP30
Duty cycle	20% (at 5 min.)
Idle running speed	100 rpm (24 V) 150 rpm*
Max. stroke	Retracted length -170 mm x2
Type of spindle	SG25x12P6 RH**, SG12x12P4 RH
Max. lifting force	800 N
Max. drive torque	5 Nm
Movement speed	50 mm/s*

* In combination with LogicData control box Compact-3

** Further types of spindles on request

Technical notes

- Depending on the the spindle pitch, the system could back-drive.

Application example

Ways of installation

Electric spindle drive 4640

Description

Motorized solution for sit-stand workplace. Stepless height adjustment to customer specific travel distance.

Special features

- Simple mounting
- Integrated position measuring system
- Single telescopic function
- Various spindle lengths and different spindle pitches are possible

Technical data

Model	4640.00-V01EXXXHXXX
Motor	DC Motor 24 V
Sensor/Power supply	Hall/5 V DC/0.3 A
Protection class	IP30
Duty cycle	20% (at 5 min.)
Idle running speed	100 rpm (24 V) 150 rpm *
Max. stroke	Retracted length -109 mm
Type of spindle	SG14x16P4 RH **
Max. lifting force	800 N
Max. drive torque	5 Nm
Movement speed	40 mm/s

* In combination with LogicData control box Compact-3

** Further types of spindles on request

Technical notes

- Depending on the the spindle pitch, the system could back-drive.

Application example

Electric spindle drive 4642

Description

Motorized solution for sit-stand workplaces. Stepless height adjustment to customer specific travel distance.

Special features

- Simple mounting
- Integrated position measuring system
- Single telescopic function
- Synchronization with up multiple actuators
- Two spindle pitches are available
- Installation length and stroke are customizable

Technical data

Model	4642.00-V01EXXXHXXX	4642.00-V02EXXXHXXX
Motor	DC Motor 18 V	DC Motor 18 V
Sensor/Power supply	Hall/5 V DC/0.3 A	Hall/5 V DC/0.3 A
Protection class	IP30	IP30
Duty cycle	20% (at 5 min.)	20% (at 5 min.)
Idle running speed	100 rpm (24 V), 150 rpm *	100 rpm (24 V), 150 rpm *
Max. stroke	Retracted length -135 mm	Retracted length -135 mm
Type of spindle	Tr16x8P4 RH**	SG14x16P4 RH **
Max. lifting force	1500 N	800 N
Max. drive torque	5 Nm	5 Nm
Movement speed	20 mm/s	40 mm/s

* In combination with LogicData control box Compact-3

** Further types of spindles on request

Technical notes

- Depending on the the spindle pitch, the system could back-drive.

Electric spindle drive 4643

Description

Powerful motorized drive unit with push-pull spindle and electromechanical end-switches. Stroke to customer demands. By simplified control function, an additional distance measuring system is not required.

Special features

- Very powerful
- For very high holding torques
- Simple installation
- Two electromechanical end-switches
- Can be adapted easily by fork crown and mounting adapter flange

Technical data

Model	4643.00-V01EXXXHXXX
Motor	DC Motor 18 V
Sensor/Powerd supply	Hall/5 V DC/0.3 A
Protection class	IP30
Duty cycle	20% (at 5 min.)
Type of spindle	Tr14x3 RH
Max. pressure force	3000 N
Movement speed	4 mm/s*

* In combination with LogicData control box Compact-3

** Further types of spindles on request

Technical notes

- Depending on the the spindle pitch, the system could back-drive.

Logic Data Control box Compact-e-3

Description

Compact is the control unit for hight adjustable workstations and is matched to all Ketterer drives.

With one control unit can be controlled:

- up to three drives in parallel structure (one or two drives follow the master drive)
- two drives synchronously (drives are individually controlled)

Special features

- Control box Compact^{eco}, Firmware-Version 1.9
- Voltage supply variants: 230 V and 110 V
- Freely stroke with hand switch with display (HSU-MDF-4M2-LD or TOUCHfx) programmable
- Ketterer can preprogram a desired stroke
- Duty cycle 2 min. ON/ 18 min. OFF
- Power cable has to be ordered separately

Technical data

3143.53-28 / Power cable LOG-CBL-PWK-USA	for control with 3-pin plug - USA 

Technical notes

- For stroke programming or changing on site a hand switch with display is always required (see hand control and motor cables)
- Please note the permissible duty cycle of the controller. If the operating times are exceeded the controller switches off automatically
- Attention: Electric drives usually have a shorter-duty cycle than controllers and are thus system-leading.

Hand control for controller Compact and motor cables

Ketterer's range of accessories offers a large selection of hand switches in various designs, with or without display, with simple or touch buttons and various motor cables to suit the respective Ketterer drives.

Special features

- Stepless adjustment
- User-defined and application-oriented control of your stepless adjustment
- Can be used with the Compact controller and all Ketterer motor drives

Technical data

Motor cable	For use with drives
4138.53-01/ Length 1 m	4630, 4773
4138.53-02/ Length 2 m	
3122.53-02/ Length 1,75 m	4643, 3120, 3121, 3122, 3133.48

Hand switch	Description
3143.47-50/ HSU-C-FL-SM-LD	Switch with display and four memory positions, stroke heights and two up-down buttons, free programmable
3143.47-48/ TOUCH-FX-MDF-KM-LD	Switch with display and four memory positions, with touch & click function

3143.47-42/ TOUCH-Basic-UD-2-LD	Simple hand control up-down, with touch function
3143.47-0003/ Receiver, remote control	RF remote control consisting of RF receiver, remote control (including battery and mounting screws), and manual

* Further details under <http://www.logicdata.at>

Motor cable 4138.53-01: 1 m long
4138.53-02: 2 m long

Motor cable 3122.53-02: 1.75 m long

Technical notes

- Hand switches with touch function require the Compact controller with firmware Version 1.9
- For stroke programming or changing the travel on site a hand switch with display is always required

Profile tubes - Profile rods

Description

You get profile rods and profile tubes as rods in a length of 3 m.

Special features

- Profile rods are made of steel and drawn according to DIN EN 10278 (hexagon bars)
- Profile rods are made of steel and drawn according to DIN EN 10278 (square bars)
- Profile tubes are made of steel, brass or aluminium (black anodized) and drawn according to DIN EN 10305
- Further profile rods, profile tubes, special lengths and machining on request

Profile tubes drawn according to DIN EN 10305

Item number Steel version	Item number Brass version	Item number Aluminium black (anodised) Aluminium-tube DIN 17611 / quality E6	Outer dimension	Inner dimension
209R0.08.0-6kt5	-	-	Ø8	hex 5 mm
209R0.09.0-6kt6-SL	-	-	Ø9	hex 6 mm
209R0.10.0-6kt6	-	-	Ø10	hex 6 mm
209R0.10.0-6kt7	-	-	Ø10	hex 7 mm
209R0.12.0-4kt7	203R0.12.0-4kt7	-	Ø12	square 7 mm
-	203R0.12.0-4kt8	-	Ø12	square 8 mm
209R0.12.0-6kt6	-	201R0.12.0-6kt6SL*	Ø12	hex 6 mm
-	-	201R0.12.0-6kt7*	Ø12	hex 7 mm
-	-	201R0.12.0-6kt8*	Ø12	hex 8 mm
209R6.09.0-6kt6	-	-	hex 9 mm	hex 6 mm
209R6.12.0-6kt9	-	-	hex 12 mm	hex 9 mm

* Due to the manufacturing process, the aluminium tubes with inner profile always have a slight twist. Therefore, it cannot be ruled out that a 6kt profile bar will jam when pushed through.
